ABOUT ME

I am currently a third-year informatics student, future mobile application developer. I am very interested in the world of technology, especially in a mobile applications. My passion for mobile application brought me to Telkom University. For the last 3 years, I studied many programming languages such as Python, Golang, and C++ to improve my problem-solving skill. Now I am currently being active as a practice assistant in Computer Network and Operating System course. being a lecturer assistant is an honor because it will improve my experience, time management skills, and discipline.
